

Computer Science 361 – Spring 2014

Team Project – Phase 1

Due: Thursday, 3/13/14 at 11:00AM

In this phase, you will provide a conceptual design for the team project.

Submit in hard copy form, by the deadline specified above, your conceptual design that includes:

1. An E/R diagram including entities, relationships, attributes and keys and their participation constraints (many-to-many, many-to-one, one-to-one, total, partial).
2. Textual descriptions of each of the entities and relationships in your E/R diagram. This will help me decipher the diagram in case you use labels in the diagram that are obvious to you but not to me.
